Joinville

Joinville is the largest city in Santa Catarina, with approximately 577 thousand inhabitants.

As a modern urban and industrial center that still retains traces of its European colonization, with flower gardens and half-timbered houses, the city manages to combine industrial potential with quality of life.

Joinville

Ranked the second best city to live in Brazil by IstoÉ magazine in 2015, Joinville hosts companies of various segments, including large multinationals, which generate employment and development for its people.

It is also due to its industrial development that Joinville has received the nickname “City of Bikes”, a reference to the means of transportation used by a large part of its workers.
